## **Allowable Acquisition Coding - Enlisted DAFSCs**

### **Excerpt from AFMAN 36-2108, Attachment 39, 30 April 2001**

Special experience identifiers (SEIs) are established when identifying experience or training critical to the job and the person assigned match, and no other identification is appropriate available. SEIs permit rapid identification of a resource already experienced to meet unique circumstances, contingency requirements, or management needs. They provide a means to track individuals and identify positions requiring or providing unique experience or training that otherwise would be lost. SEIs may be used to better distribute personnel and optimize the job and person match insofar as possible.
